## Relevant Experience

---

### Full Stack Web Developer for Project Matching System | Seattle, WA

June 2023

*React | node.js | express.js | mySQL*

<https://proj-portal.netlify.app/>

- Led a team of 4 within an agile environment to create an application that assisted users to form teams around various project ideas
- Developed a RESTful API with full CRUD functionality using Object-Relational-Mapping library Sequelize, consisting of multiple relationships between tables (ex. One-to-many, Many-to-many)
- Utilized node.js package manager (npm) to install various dependencies such as JWT's, bcrypt, and cloudinary
- Successful deployment and continuous management of application on Netlify and Heroku
- Incorporated JSON web tokens (JWT's) for user authentication when creating a user and logging in
- Developed React frontend capable of speaking to database through team-created API
- Styled application using custom CSS and CSS-Library, Bootstrap
- Utilize web-socket for live chat capabilities with users that joined the same project

### Full Stack Web Developer for Social Media Application | Seattle, WA

May 2023

*Handlebars.js | node.js | express.js | mySQL*

<https://bite-buddies.herokuapp.com/>

- Member of a team of 3 within an agile environment that allowed users to connect with one another based on similar food interests
- Utilized frontend templating engine, handlebars.js, to properly data requested from database
- Built RESTful API with full CRUD functionality using Object-Relational-Mapping library Sequelize
- Created chat functionality through use of tables of messages and users
- User authentication through session cookies
- Successful development of application on Heroku

### Frontend Web Developer for Create Your Own Adventure Game | Seattle, WA

April 2023

*HTML | CSS | JavaScript*

<https://bear-muna.github.io/enter-the-temple/>

- Member of a team of 3 within an agile environment to create an application that allows the user to try and navigate through a temple by choosing between several doors
- Used JavaScript to properly render which "room" the user will enter
- Styled application using custom CSS and third-party API, rpgui
- Incorporated multiple third-party APIs in application such as pixabay for picture selection and a custom riddle API

## EDUCATION

---

University of Washington | Seattle, WA

Graduated June 2019
