

# EDWARD-JOHN MUNA

## EDUCATION

**University of Washington**, Seattle, WA  
**Full-Stack Developer Certificate**, Web Development, 06/2023  
**University of Washington**, Seattle, WA  
**Bachelor of Science**, Biology, 06/2019

## SKILLS

- React
- Express.js
- Databases: Oracle, SQL Server, MongoDB
- Node.js
- HTML / CSS / JS Proficiency
- Java
- API Development
- RESTful API Development
- Version Control Proficiency (Git)
- Excellent Communication
- Flexible and Adaptable
- Organization and Time Management

## PROFESSIONAL SUMMARY

With a strong understanding in fullstack development, I aim to build robust, intricate, and fun user experiences. After building several applications through a full development life cycle and under an agile work environment, I believe I am well equipped to work for your company as a full stack developer.

## PROJECTS

### **FULL STACK DEVELOPER** 05/2023 to 06/2023

Seattle, WA

#### ***Project Portal***

<https://proj-portal.netlify.app/>

- Assisted users to form teams around various project ideas
- Implemented a server using a mySQL database with React to persist data amongst users
- Worked in teams efficiently to produce a robust, full-stack application within a small time frame
- Integrated web-socket for live chat experience

### **FULL STACK DEVELOPER** 04/2023 to 05/2023

Seattle, WA

#### ***Bite Buddies***

<https://bite-buddies.herokuapp.com/>

- Assisted in building a full-stack application that allowed users to connect with one another based on similar food interests
- Successfully managed and deployed a robust, full-stack application involving handlebars.js, mySQL, node.js, and express.js
- Helped team members with various coding problems in creating project

### **FULL STACK DEVELOPER** 03/2023 to 04/2023

Seattle, WA

#### ***Bite Buddies***

<https://bite-buddies.herokuapp.com/>

- Assisted in building a full-stack application that allowed users to connect with one another based on similar food interests
- Successfully managed and deployed a robust, full-stack application involving handlebars.js, mySQL, node.js, and express.js
- Helped team members with various coding problems in creating project
