EDUCATION

June 2023
Full-Stack Developer Certificate Web Development
University of Washington, Seattle, WA

June 2019
Bachelor of Science Biology
University of Washington, Seattle, WA

PROFESSIONAL SUMMARY

With a solid understanding/foundation in building end-to-end applications, I aim to make it easier for users to achieve their own goals through simple, yet effective application designs.

PROFESSIONAL EXPERIENCE

May 2023 - June 2023
Full Stack Developer, Seattle, WA
Project Portal
https://proj-portal.netlify.app/
- Assisted users to form teams around various project ideas
- Implemented a server using a mySQL database with React to persist data amongst users
- Worked in teams efficiently to produce a robust, full-stack application within a small time frame
- Integrated web-socket for live chat experience

April 2023 - May 2023
Full Stack Developer, Seattle, WA
Bite Buddies
https://bite-buddies.herokuapp.com/
- Assisted in building a full-stack application that allowed users to connect with one another based on similar food interests
- Successfully managed and deployed a robust, full-stack application involving handlebars.js, mySQL, node.js, and express.js
- Helped team members with various coding problems in creating project

March 2023 - April 2023
Full Stack Developer, Seattle, WA
Bite Buddies
